MEMORANDUM FOR: Mr. R. J. Smith

25X1

SUBJECT : Key Vietnamese Documents

1. One of the problems that has beset the US Government in connection with the complex issue of Vietnam has been the genuine ignorance in academic and opinion-molding circles about the nature of Vietnamese Communism and the plans, aspirations or broad strategy of the Lao Dong Party over the past two and a half decades. One of the principal reasons for this widespread ignorance has been the dearth of readily available primary source material. Actually there is a lot of material lying around, but relatively little of it is easily accessible to or useable by scholars or serious students of current affairs.

2. For some time it has seemed to me that the US Government could do the academic world and the public at large a considerable service, and in the process reap a great deal of indirect benefit itself, by making the real record on Vietnamese Communist Party history and intentions easy to come by and to use. Over the years we have acquired by capture or other means a rich haul of major documents which, in the aggregate, shed a great deal of objective light on a number of topics now debated with considerably more passion than knowledge. Some branch of the government (not this Agency) should publish such documents in a kind of monograph series, within which each major document could be separately published under a uniform format. This series could be made available at cost to universities, libraries, research institutions and interested individuals. For the series to have maximum

utility each document published therein should be well and carefully translated and should be prefaced by a concise but clear note giving enough of its background or mode of acquisition to enable readers to form their own valid judgments of its authenticity. Furthermore, there should be a modest critical apparatus in each publication -- none of it polemic -- which simply would clarify allusions, dates or references to incidents or individuals whose import might not be clear to the non-specialized reader.

3. I intend to float this idea as a serious proposal to the Sullivan Committee in the fairly near future. The idea stands a better chance of being favorably received, however, if it is buttressed by essential preliminary homework. Appended hereto is a list compiled by Mr. Weiss of the documents he feels are suitable candidates for inclusion in such a series. (Through bureaucratic inertia, some of them are still classified, but none of them really warrant security classification at this time.) I would appreciate it if the recipients of this memorandum or their colleagues would review this list and offer any suggestions they have for additions, deletions or other modifications.
